DETAILED ACTION

Page 2

Election/Restrictions

1. Applicant's election with traverse of Group I, Species F (page 10, lines 3-14) in the reply filed on May 20, 2005 is acknowledged. The traversal is on the ground(s) that Group I and II are different aspects of a single invention and the claims have common distinctive features. This is not found persuasive because applicant's allegation of a single invention is unsupported by facts. Additionally, although the claims may recite some common features, not all features are present in both groups. Paragraph 2 of the Election/Restriction Requirement mailed on April 20, 2005 provides for the basis of the restriction requirement.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "multi-layer" recited in claims 20 and 24; and the "additional substrate material" recited in claims 21 and 36 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate

Page 3

prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 20 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites "a further coating" in line 2. It appears to be a double inclusion of the second coating recited in claim 16.

Claim 33 recites "a ceramic material" in line 2. It appears to be a double inclusion of the further coating recited in claim 24.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsushita et al. (EP 0 828 075).

Matsushita discloses an injection nozzle comprising: a nozzle body 8; a first coating 61, 64; a second coating 7, 94.

7. Claims 24-26, 31-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Susumu (10-274134).

Susumu discloses an injection nozzle comprising: a nozzle body 31; a first coating 37; a further coating 36.

Claim Rejections - 35 USC § 103

8. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Susumu (10-274134) in view of Voss et al. (5,987,882).

Susumu discloses the limitations of the claimed invention with the exception of the additional substrate material. Voss et al. discloses, in column 13, lines 14-22, an additional substrate material (a bond layer) between a ceramic layer and a metal surface. It would have been obvious to a person having ordinary skill in the art at the

Art Unit: 3752

time of the invention to have provided an additional substrate material to the device of Susumu as taught by Voss et al. to increase adhesion.

9. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushita et al. (EP 0 828 075) in view of Voss et al. (5,987,882).

Matsushita discloses the limitations of the claimed invention with the exception of the additional substrate material. Voss et al. discloses, in column 13, lines 14-22, an additional substrate material (a bond layer) between a ceramic layer and a metal surface. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided an additional substrate material to the device of Matsushita as taught by Voss et al. to increase adhesion.

10. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushita et al. (EP 0 828 075) in view of Susumu (10-274134).

Matsushita discloses the limitations of the claimed invention with the exception of the insulating material 7, 94 being a ceramic material. Susumu discloses a ceramic material 37. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have made the insulating material of Matsushita from ceramic material as taught by Susumu to decrease deposit at high temperature.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (571)

Art Unit: 3752

272-4905. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
